Excel® 8236NRR® – 2.3 Maturity. This is a new variety that was the highest yielding soybean out of 49 entries in the Central–East District of the Iowa State University yield trials, Clarence, Iowa. Excellent emergence and standability. Has XG1k gene for Phytophthora resistance. Excellent white mold and sudden death syndrome resistance as well as moderate resistance to brown stem rot.

Excel® 8257RR® – 2.5 Maturity. New genetics. This variety has excellent emergence and standability. It also has excellent Phytophthora race resistance. Has excellent resistance to brown stem rot and excellent tolerance to white mold.

SOYBEAN CHARACTERISTICS CHART

Variety	Type	Maturity	Emerge	Stand	Height	PRR	BSR	SCN	White Mold
Excel® 8236NRR®	RR	2.3	9	9	32"	9	8	R	9
Excel® 8257RR®	RR	2.5	9	9	32"	9	9	S	9

Characteristics are rated on a scale of 1 to 9, where 1 equals poorest and 9 equals best.

Round Up Ready Soybeans® are patented and can not be saved from production and planted the next year. Seed Piracy will be prosecuted to the extent of the law. Professionally grown and cleaned seed produces higher yields. Why take the risk? Several multiple year tests from universities show 1.9 to 2.7 bushel increase over bin run.

All Roundup Ready® soybeans are protected under U.S. patents 4,535,060; 4,940,835 and 5,352,605. Saving Roundup Ready® soybean seed for replanting is a violation of these patents and could result in loss of future technologies and their benefits for the soybean industry. A person who helps a grower save Roundup Ready® soybean seed for replanting is also infringing the patents and in contributing to violation of the terms under which the seed was sold.

Excel® is a registered trademark of Syngenta Corp Protection Inc and is used under License.
