Wide selection of other Certified Organic Seeds Available upon request.

MULTIOAT brand OATS;

Plant the "Multioat" varieties for maximum profit! High yields, heavy test weights, high protein, and excellent standing quality set these oats apart in the market place.

Multioat SE2004

(Short height, Early) NEW -High quality oats -Standability of SE88, with maximum disease resistance. Higher Yielding , Heavier Test weights than previous varieties.

Multioat TE2004

(Tall, Early) Maximum Straw, Stands well for a tall oat Great test weight for an early oat.

Multioat MM98

(Medium height, Midseason) Great test weight and standability. Great yield potential

Multioat MM2000

(Medium height, Midseason) Very good test weight and standability. Our Highest Yielding Oats, Great disease resistance package, Strong emergence

Multioat TM90

(Tall, Midseason) This oat has the heaviest test weight we have ever seen. For maximum straw, top protein, and good standability, plant TM90. Resistant to "Smut".

Striker Forage Oats Great for chopping, lots of tonage, high feed value, plant spring or fall!

 Fax (319) 465-5959 www.naylorseed.com

MANY THANKS for your past purchases and/or interest in **NAYLORSEED** sweet corn.

We offer several varieties of sweet corn in **bicolor**. We have three varieties that are **surgary enhancers (SE)** which have excellent taste, tenderness and texture. The SE varieties are less restrictive on isolation from other corn.

We also have one variety which is **Synergistic (se/sh2) and it has 75% (SE) kernels and 25% (SH2) kernels**. The result blends the natural corn flavor and tenderness of sugary enhanced (SE) sweet corn with the higher sugar levels and better keeping qualities of the supersweet (SH2) types. Synergistics are the latest generation of sweet corn hybrids and their quality and flavor is amazing.

We have reserved what we believe to be ample supplies. In case the demand is greater than we anticipate, **EARLY ORDERS** will be shipped as requested, but late orders may necessitate substitutes for certain hybrids.

Our 2011 prices on these hybrids offered on a F.O.B. basis are:

<u>TOTAL POUNDS ORDERED</u>	<u>PRICE PER POUND</u>		<u>SHIPPING & HANDLING POUNDS</u>	
		Synergistic		
		SE		
1 lb. - 9 lb.	= \$15.00	\$11.00	1-5	= \$8.75*
10 lb. - 99 lb.	= \$14.50	\$10.50	6-10	= \$11.50*

*Shipping is figured for in the state of Iowa shipment only.
 Out of state and larger quantities call for shipping rates.

Please fill in the order form below with your enclosed check as soon as possible to insure your sweet corn supplies.
 (PLEASE NO CREDIT CARD, CASH OR C.O.D ORDERS.)

Excel® 8236NRR® – 2.3 Maturity. This is a new variety that was the highest yielding soybean out of 49 entries in the Central–East District of the Iowa State University yield trials, Clarence, Iowa. Excellent emergence and standability. Has XG1k gene for Phytophthora resistance. Excellent white mold and sudden death syndrome resistance as well as moderate resistance to brown stem rot.

Excel® 8257RR® – 2.5 Maturity. New genetics. This variety has excellent emergence and standability. It also has excellent Phytophthora race resistance. Has excellent resistance to brown stem rot and excellent tolerance to white mold.

SOYBEAN CHARACTERISTICS CHART

Variety	Type	Maturity	Emerge	Stand	Height	PRR	BSR	SCN	White Mold
Excel® 8236NRR®	RR	2.3	9	9	32"	9	8	R	9
Excel® 8257RR®	RR	2.5	9	9	32"	9	9	S	9

Characteristics are rated on a scale of 1 to 9, where 1 equals poorest and 9 equals best.

Round Up Ready Soybeans® are patented and can not be saved from production and planted the next year. Seed Piracy will be prosecuted to the extent of the law. Professionally grown and cleaned seed produces higher yields. Why take the risk? Several multiple year tests from universities show 1.9 to 2.7 bushel increase over bin run.

All Roundup Ready® soybeans are protected under U.S. patents 4,535,060; 4,940,835 and 5,352,605. Saving Roundup Ready® soybean seed for replanting is a violation of these patents and could result in loss of future technologies and their benefits for the soybean industry. A person who helps a grower save Roundup Ready® soybean seed for replanting is also infringing the patents and in contributing to violation of the terms under which the seed was sold.

Excel® is a registered trademark of Syngenta Corp Protection Inc and is used under License.

Several multiple year tests from universities show 1.9 to 2.7 bushel increase over bin run. All Roundup Ready® soybeans are protected under U.S. patents 4,535,060; 4,940,835 and 5,352,605. Saving Roundup Ready® soybean seed for replanting is a violation of these patents and could result in loss of future technologies and their benefits for the soybean industry. A person who helps a grower save Roundup Ready® soybean seed for replanting is also infringing the patents and in contributing to violation of the terms under which the seed was sold. Excel® is a registered trademark of Syngenta Corp Protection Inc and is used under License.
